*Let the future tell the truth, and evaluate each one according to his work and accomplishments.
The present is theirs; the future, for which I have really worked, is mine*

a bright influence from a bright genius

He was born in July of 1856 in a strange night when a fierce electric storm was breaking out. His only idea since from his childhood was a more developed world and to be beneficial to people. He has his name in the pages of the history to be remembered eternally. Those feelings have always been far ahead the monetary concerns for him. Even if most of his dreams still seem to be impossible even today, by acting with the idea of **"Human can achieve the impossible"** is not sufficient. Because human can also achieve beyond the impossible, he continued his studies despite all of the challenges he experienced in the fields of physics and electrophysics he has mastered and completed Rotating Magnetic Field in 1882, AC Motor in 1883, Tesla Coil in 1890 and Radio and Wireless Electricity Transmission in 1897 and

achieved his dreams which were thought to be impossible and has brought life to his inventions which determine the future of humanity. As **TESLA PLASTİK**, we were influenced by **Nikola TESLA** and we set off with the motto of **"nothing is impossible"**. We adopted his foresights and his approach to life as our vision. We adopted dreaming as a mission and to deal with every difficulty we may encounter while we are realizing such dreams and never to give up as a key to success. We set our future goals with the quote of Nikola **TESLA** **"Let the future tell the truth, and evaluate each one according to his work and accomplishments. The present is theirs; the future, for which I have really worked, is mine."** We owe Nikola **TESLA** a debt of gratitude for earning the eternal appreciation of humanity.

FLOREX Dökk®

Can be used anywhere that conventional bulk garbage bags are used. Having excellent flexing properties and high strength **Florex Dökk** has **ISO 9001**, **TSE** and **ÇEVKO** certifications Certified by **İTÖ** and **100%** domestic production.

Florex Dökk roll garbage bags is a product which are produced as an alternative to bulk garbage bags traditionally sold in kilograms.

Our products have a mission to explain our society that traditional bulk garbage bags sold on the market are not cheap and useful, yet, expensive and harmful.

Bulk garbage bags are made of low-strength (decayed) polymer mixtures which have completed their recycling cycle.

HARMS CAUSED BY BULK GARBAGE BAGS:

- They are unhealthy.
- They cause intensive bad odor.
- They cannot be manufactured thin.
- They have to be manufactured thicker.
- They are easily torn, they are not flexible.
- Weight of each bag is different from each other since standard thickness cannot be achieved.
- Seeming to be cheap when considered on weight basis are more expensive when considered in terms of quantity.
- Since they are not manufactured in roll and perforated form, their use cannot be kept under control.
- They are hard to stack and store.
- No bulk garbage bags have **TSE**, **TSEK**, **ISO 9001** and **ÇEVKO** etc. certifications.

NEXT GENERATION BULK GARBAGE BAGS

BLACK OUTER BLUE INNER

excellent flexing property
and strength!..

ENVIRONMENT FRIENDLY

ISO:9001
KALİTE YÖNETİMİ

Türkiye

TESLA PLASTİK

www.teslaplastik.com.tr

Florex Dökk roll garbage bags are manufactured by state of the art servo motor and **PLC** assisted **CO-EX** machinery, therefore, they are **40%** stronger than bulk garbage bags and perfectly flexible.

Since our products are **flexible** and **strong**, they have a higher carrying performance than traditional bulk garbage bags.

Since **Florex Dökk** roll garbage bags are manufactured in rolls containing **10** and **20** pieces and boxed in cartons, they ensure usage control and tracking unlike traditional bulk garbage bags and they prove that even a garbage bag has aesthetics.

Florex Dökk roll garbage bags are more advantageous than traditional bulk garbage bags in terms of unit cost.

1 Kg price of traditional bulk garbage bag 1 /
Number of bags contained 1 Kg (avg. 7 pieces)
= price of 1 piece of bulk bag. (Jumbo
Standard Code: An example that is applicable
for our 518 product.)

Carton price of **Florex Dökk** roll garbage bag
/ 180 pieces = Price per 1 piece of Florex roll
bag.

When this comparison is made it can be seen
that unit cost of **Florex Dökk** roll garbage bag
is "**LOWER**" than the unit cost of a traditional
bulk garbage bag.
